INDEX TO VOLUME 144

Abell, G. O. Properties of Some Old Planetary Nebulae, 259.
Absolute Transition Rates of Atomic Transitions of Copper, Silver, and Gold (Moise), 774.
Absorption Lines in the Spectra of Distant Sources (Bahcall and Salpeter), 847.
Absorption Technique for the Measurement of Absolute Rates of Atomic Transitions (Moise), 763.
Aller, Lawrence H. *See* Chapman, Clarke, and Aller.
Aller, Lawrence H., Faulkner, Donald J., and Norton, Robert H. Photoelectric Spectrophotometry of Selected Southern Stars, 1073.
Aller, Lawrence H., Kaler, James B., and Bowen, Ira S. Spectrophotometric Studies of Gaseous Nebulae. VII. The Ring Planetary NGC 7662, 291.
Analytical Solution for Gravitational Collapse with Radiation (Vaidya), 943.
Anand, S. P. S. *See* Bardeen and Anand.
Angular Expansions of Planetary Nebulae (Liller, Welther, and Liller), 280.
Approximate Method for Determining When Any Gas Is Collision-dominated (Sampson), 96.
Arpigny, Claude. The C_2 Swan Bands in Comets, 424.
Athay, R. Grant. Theoretical Line Intensities. IV. Source Functions and Equivalent Widths, 1159.
Aveni, Anthony F. The Effect of Line Emission upon the $B - V$ Colors of T Tauri Objects, 666.
Avila, C. *See* Schlüter and Avila.
Avrett, E. H. Source-Function Equality in Multiplets, 59.

Bahcall, John N., and Salpeter, E. E. Absorption Lines in the Spectra of Distant Sources, 847.
Balmer-Line–blanketed Model Atmospheres for A-Type Stars (Mihalas), 454.
Bardeen, James M., and Anand, S. P. S. Upper Limit on the Binding Energy of a Magneto-turbulent Supermassive Star, 953.
Barrett, A. H. *See* Staelin and Barrett.
Belton, Michael J. S., and Brandt, John C. Interplanetary Gas. XII. A Catalogue of Comet-Tail Orientations, 456.
Benesch, William. *See* Tilford, Wilkinson, Franklin, Naber, Benesch, and Vanderslice.
Benesch, William, Vanderslice, Joseph T., Tilford, S. G., and Wilkinson, P. G. Franck-Condon Factors for Permitted Transitions in N_2, 408.
Bergh, Sidney van den. Observations of Faint Blue Objects, 866.
Binder, Alan B., and Cruikshank, Dale P. On the Spectra of the Galilean Satellites of Jupiter, 1240.
Bodenheimer, Peter. Depletion of Deuterium and Beryllium during Pre–Main-Sequence Evolution, 103.
Bodenheimer, Peter. Studies in Stellar Evolution. IV. The Influence of Initial Conditions on Pre–Main-Sequence Calculations, 709.
Boland, J. W., Hollinger, J. P., Mayer, C. H., and McCullough, T. P. Polarization of Cygnus A, Taurus A, and Cassiopeia A at 2.07 Centimeters, 437.
Bolton, J. G., Clarke, Margaret E., Sandage, Allan, and Véron, P. Identification of Six Faint Radio Sources with Quasi-stellar Objects, 860.
Bolton, J. G., Shimmins, A. J., Ekers, J., Kinman, T. D., Lamla, E., and Wirtanen, C. A. Radio and Optical Data on Fifteen Quasi-stellar Objects, 1229.
Born Cross-Sections for Double-Transition Collisions of Hydrogen Atoms (Pomilla and Milford), 1174.
Bowen, Ira S. *See* Aller, Kaler, and Bowen.
Boyce, Peter B. Some Effects of Neglecting Interstellar Reddening in the Orion Nebula, 831.

Braccesi, A., Ceccarelli, M., Fanti, R., Giovannini, G., and Ficarra, A. On Radio Emission from Blue Stellar Objects, 821.
Bradt, H. *See* Gursky, Giacconi, Gorenstein, Waters, Oda, Bradt, Garmire, and Sreekantan.
Brandt, John C. Consequences of the Torque Exerted on the Sun by the Solar Wind, 1221.
Brandt, John C. *See* Belton and Brandt.
Brownlee, Robert R. *See* Cox, Brownlee, and Eilers.
Burbidge, E. M., Lynds, C. R., and Burbidge, G. R. On the Measurement and Interpretations of Absorption Features in the Spectrum of the Quasi-stellar Object 3C 191, 447.
Burbidge, G. R. *See* Burbidge, Lynds, and Burbidge.
Burbidge, G. R. *See* Hoyle and Burbidge.

C_2 Swan Bands in Comets (Arpigny), 424.
Calculation of Direct Eclipse Functions. III, IV, V (Linnell), 1258.
Catalogue of Spectra of Mira Variables of Types Me and Se (Keenan), 457.
Ceccarelli, M. *See* Braccesi, Ceccarelli, Fanti, Giovannini, and Ficarra.
Chamberlain, Joseph W., and McElroy, Michael B. Diffuse Reflection by an Inhomogeneous Planetary Atmosphere, 1148.
Chapman, Robert D., Clarke, William H., and Aller, Lawrence H. Theoretical Oscillator Strengths for Some Transitions of Astrophysical Interest, 376.
Christy, R. F. Comments on Non-linear Pulsation Calculations of Cox, Cox, Olsen, King, and Eilers, 1212.
Christy, Robert F. A Study of Pulsation in RR Lyrae Models, 108.
Clarke, Margaret E. *See* Bolton, Clarke, Sandage, and Véron.
Clarke, William H. *See* Chapman, Clarke, and Aller.
Clement, Maurice J. On the Exact Splitting of the Pulsation Modes in Connection with the Beta Canis Majoris Stars, 841.
Coherence Analysis of Fraunhofer-Line Fine Structure and Continuum Brightness Fluctuations near the Center of the Solar Disk. II (Edmonds), 733.
Collapsed Stars in Binaries (Zeldovich and Guseynov), 840.
Color-Magnitude Diagram of the Metal-rich Globular Cluster NGC 6712 (Sandage and Smith), 886.
Comments on Non-linear Pulsation Calculations of Cox, Cox, Olsen, King, and Eilers (Christy), 1212.
Comments on Reitmeyer's "Photoelectric Observations of the Orion Nebula at Seven Wavelengths" (O'Dell), 427.
Comparison of the Degree of Polarization with Other Radio Source Parameters (Maltby), 219.
Comparison of the Infrared Spectra of the Moon and Simulated Lunar Surface Materials (Wattson and Hapke), 364.
Consequences of the Torque Exerted on the Sun by the Solar Wind (Brandt), 1221.
Continuous Absorption by He^- (McDowell, Williamson, and Myerscough), 827.
Contopoulos, G. Tables of the Third Integral, 1260.
Convergence of the Iterative Solution of the Auxiliary Equations for Rayleigh Scattering (Dave and Walker), 798.
Cosmic Black-Body Radiation, High-Energy Electrons, and the Origin in Isotropic X-Ray and Gamma Radiation (Fazio, Stecker, and Wright), 611.
Cowley, Anne P., and Cowley, Charles R. Recent Changes in the Spectrum of HR 8164 (Boss 5481 A), 824.
